

[Tiny but Mighty]

3.6V/3.7V Li-ion / IMR / INR / ICR:

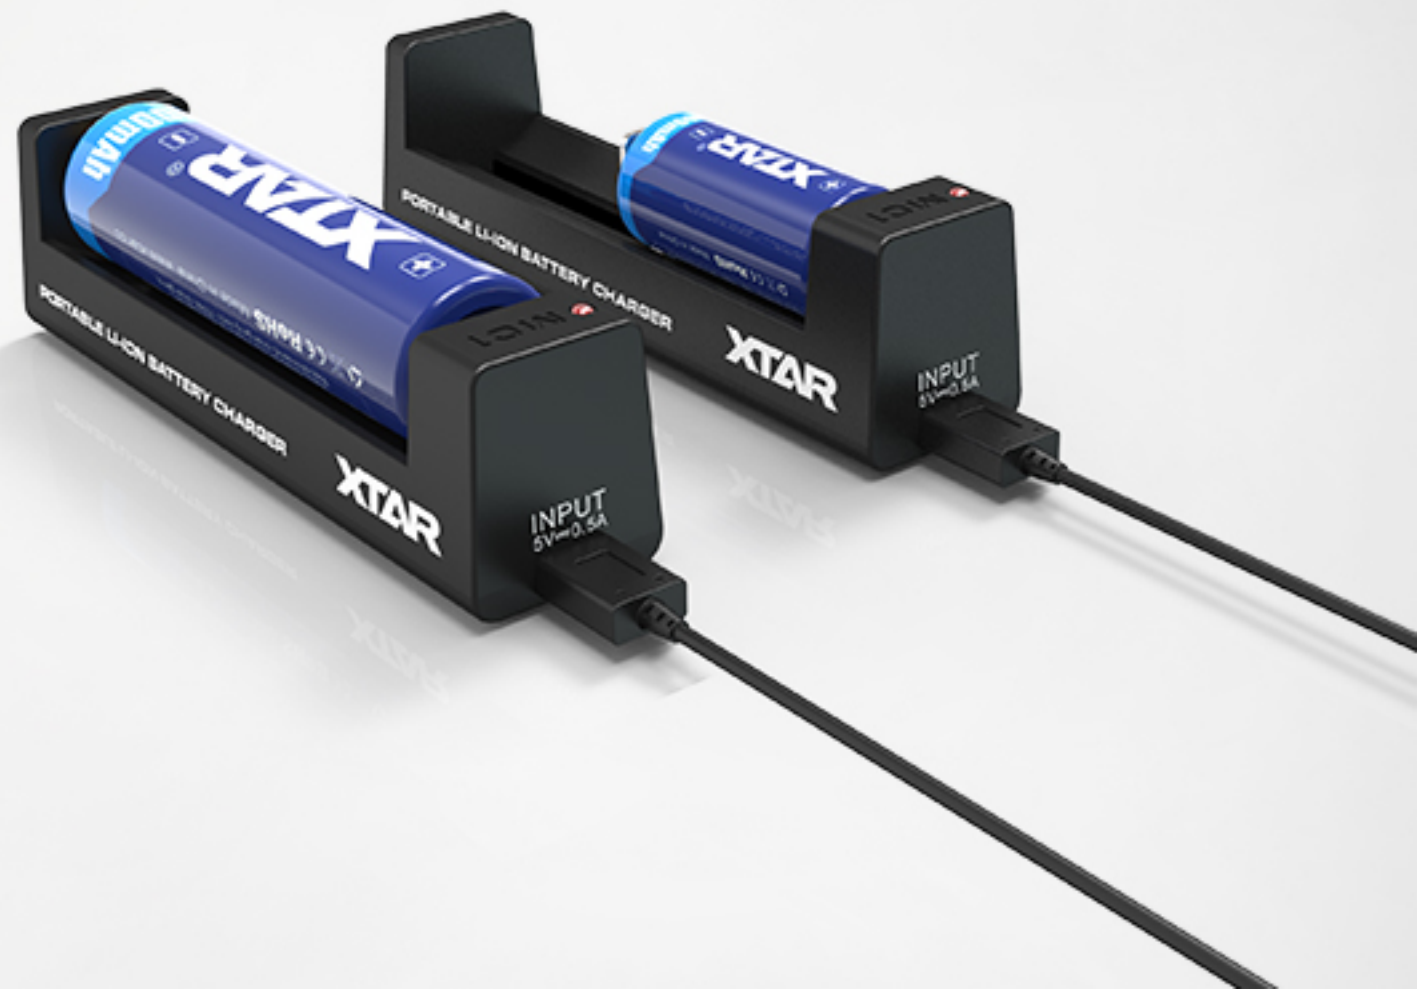

10440 14500 14650 16340 17335

17500 17670 18350 18490 18500

18650 18700 20700 21700 22650

25500 Flat-26650

Note: Cannot charge protected 20700/21700 batteries.

[Charge Everywhere]

Compatible with all 5V USB power sources

5V Micro-USB Powered

computer

adapter

power bank

solar panel

[0V Activation Function]

Most batteries we discarded are over-discharged batteries, and 0V Activation Function brings them back to life. Originally invented by XTAR, we are still leading the technology.

[No Accidents Can Stop Charging]

Shock Resistant Technology prevents batteries from falling out in any cases

[Safe, Durable and Peace of Mind]

CE, FCC, RoHS certified

1 year warranty

Extra-low safe input voltage

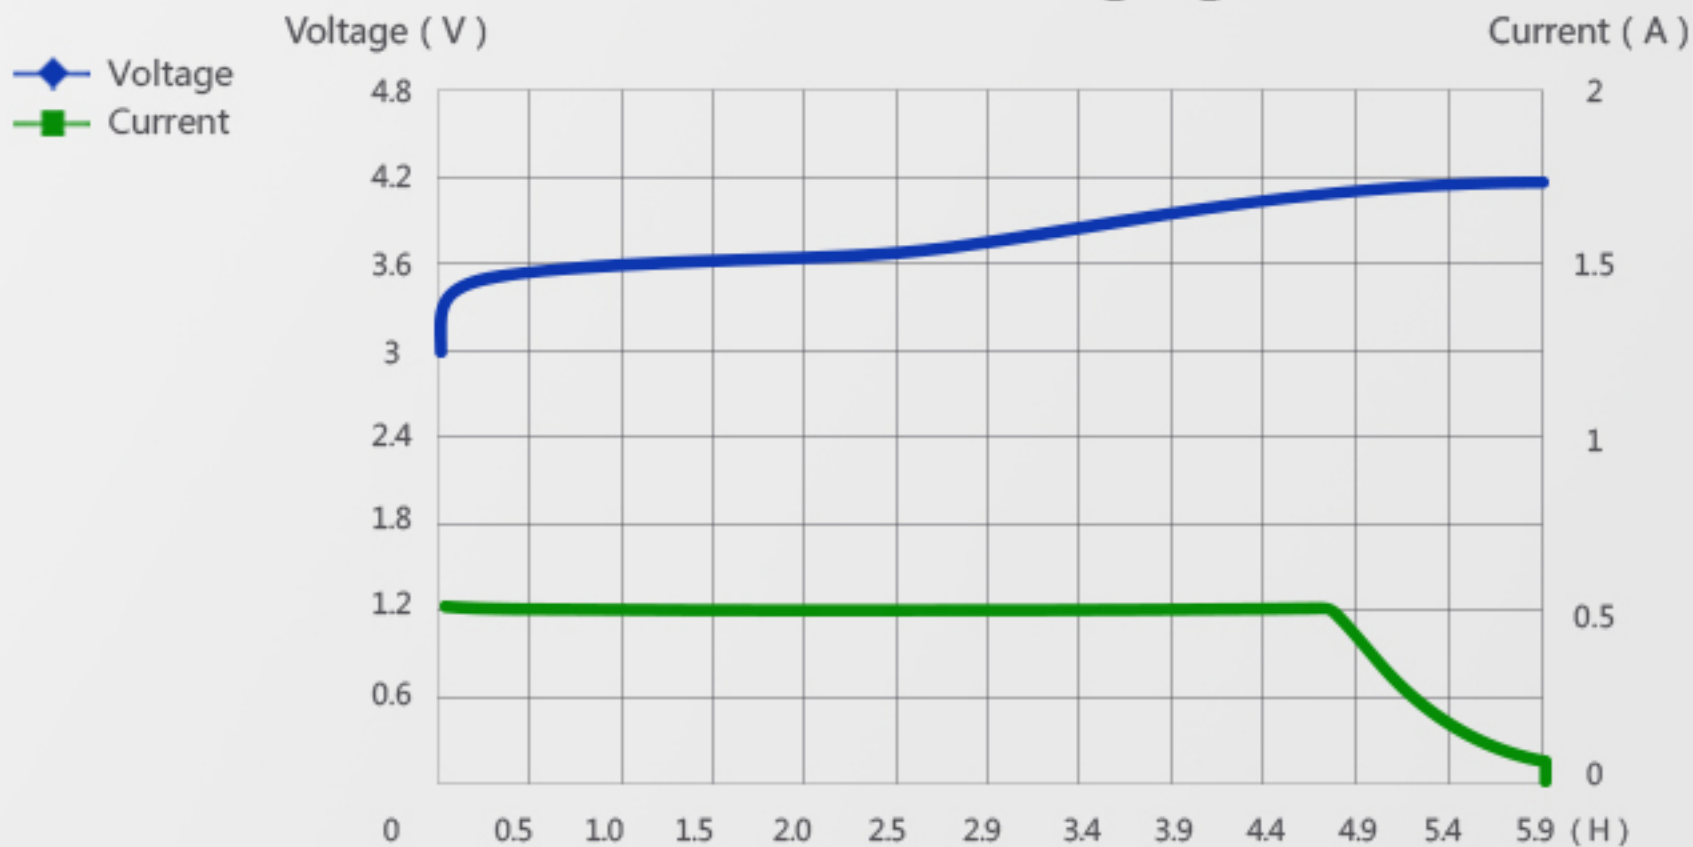

Temperature monitoring

Flame retardant material

Reverse polarity and short circuit protection

[Battery Life Optimization]

Accurate cut-off, efficient charging, never overcharge

Li-ion: XTVTC4/2200mAh-0.5A

[MC1 Specification]

Input	DC 5V/500mA
Constant current output	500mA
Cut-off Voltage	4.2V
Operation Temperature	0-40°C

Net weight: 24g / Size: L92*W22*H26mm

[New Package Contents]

MC1 charger, USB cable, manual
